Enabling greater access to precision retinal screening

Verily is expanding access to an easy-to-use, high-quality, retinal health screening solution for patients everywhere to help aid in diagnosis of diabetic retinopathy

Verily Numetric Retinal Camera

Advanced, easy-to-use technology

Our lightweight and portable non mydriatic fundus camera is built with advanced lighting and stabilization technology, making it easy for clinicians, operators and patients.

- High quality images captured, even in bright rooms, with no dilation needed
- Illumination optimization and advanced burst imaging
- Patient self-alignment and automatic image capture, making it easy for any staff member to conduct screenings
- Wireless, encrypted upload for teleretinal grading

| 97%	5.1min	83%
Gradability (patient level)	Median time with patient	Same-day results delivery

Note: performance is *not* guaranteed and results may differ. Results are from the first three months on the market.

Four steps to an easier eye screening with the VNRS

Order an exam, conduct a screening in 5 minutes, and receive results of screening – all within the same solution

1 Order exam

2 Conduct screening

3 Processing and grading

4 Receive results

The integrated platform

Connected, secure software

Verily's software seamlessly integrates retinal health screenings into existing workflows, helping providers easily connect the service to patients that need it the most

- EHR order to camera integration
- Return of results to EHR patient record
- Quality program monitoring (e.g., HEDIS)
- Wireless, encrypted upload for teleretinal grading

Close care gaps and aid in early detection

Together, our software and hardware solution can enable early detection and referral for patients with Diabetic Retinopathy

Improve health outcomes
By detecting Diabetic Retinopathy cases with a short turnaround time

Simplify and enhance
Patient and staff member experience with a simple to use camera

Increase exam rates
Boost HEDIS quality measures and close care gaps with higher exam rates

Enable provider collaboration
By supporting referrals for eye care practitioners

Empowering providers and patients to stay ahead by building tools that bring the promise of precision health to everyone, every day.
